Any missed annual service(s) may incur a pro-rata charge to cover additional checks/parts which may need to be performed/replaced that are deemed necessary due to these checks/parts not being performed or replaced during previous missed annual service(s).

The above costs are a minimum cost per service. Further costs may be applicable should it be deemed that a component needs to be cleaned, replaced or repaired outside of the terms of the warranty.

The 6 Year Warranty is subject to each of the above annual service/calibrations being carried out by TPI Europe Ltd (or one of their approved Service Centres). Failure to have any of the annual service/calibrations performed will invalidate the warranty. Please note that annual service/calibration is a requirement as set out in BS7967.

Calibration Certificate - Please Note all TPI FGAs come, as standard, with a Calibration Sticker and the Calibration Date held electronically within the FGA. This is sufficient to prove "in calibration" when being assessed by a Gas Safe Register Inspector. In fact the 716 & 717R also prints out the serial number and next calibration due date at the bottom of each print out.

Any of the above costs are subject to change at the discretion of TPI Europe Ltd without prior written notification.  
All of the above prices are exclusive of VAT and effective from 1st January 2017
